

Eternity Lasts The Longest

Vera Eisberg

They have sworn eternal love to the Tango and have clearly done well by it (remember the Tango club). Vera Eisberg's Tango couple illustrates that Tango guarantees dependability, longevity and, in

the long run, energy savings. It follows its own rules and reaches its goal quicker than the others (remember the reaction calorimeter that also has no time to lose). In the scientific journal, „Bild der Wissenschaft“, combinatorial chemistry (planned coincidence) was used as an example to show that time plays an essential role for jewelry thieves as well as for the pharmaceutical industries.

Tempo needs Tango. Now it is (planned coincidence) a world wide reality, that Tango and the big Unistats have become essential for combinatorial chemistry and reaction calorimetry. Eternity lasts the longest, and time never ends, but for the more demanding tasks, time has run out for conventional temperature control applications.
