

## No Need To Hurry, It's Not a Waltz!

Graph Druckula

In dubio pro tango. The process of the Tango-Alemanno - the Tango-Aleman as it is called in Spanish - provides speed and also helps preserve resources. This phenomenon is described in detail in the Handbook of Thermoregulation Technology. The Tango only affects the heart and is more favorable energy-wise than the waltz and disco-fox, which take a definite toll on your sense of balance and on your calves. The picture of the couple on the Pza. Dorrego creates an optimistic mood and hints at the fact that the Tango-Argentino is a procedure that preserves resources.

The dance school Wehrle-Walz ([www.tanzen-bei-wehrle.de](http://www.tanzen-bei-wehrle.de)) is world renown for hosting the Offenburger Latin-Cup and for its 30 year attempt to teach this author the ballroom tango - who has been attempting to learn out of sheer vanity and because of his social obligations. With Act I, Chapter 5 ([www.temperiertechnik.de](http://www.temperiertechnik.de)) at the back of our minds the author can clearly state from his own experience that the Tango which is heart felt is energetically better than the waltz or the fox trot which make you feel your sense of balance, your heart and your calves. September, as the Tango calendar shows, is the time when the dance schools bombard you with their new winter programs and you are once more faced with the task of conquering your weaker self and enrolling for a new course that depletes valuable time needed for meetings, meeting with friends and writing the Handbook of Thermoregulation. At the time the author is obligated to maintain an effective lifestyle as described in Act II, Chapter 1-14. This is the reason why Markus Wegel ([www.tanzschule-wegel.de](http://www.tanzschule-wegel.de)) and the author's wife have combined their resources in the joint venture of teaching the author how to tango-argentino - who is striving to preserve his resources and to become a member of the international Tango-club.

No corras, el tiempo no se acaba. Why hurry, time never ends.

With this positive assessment let us return to the Tango-Alemano and to the Tango factory. There is much work to be done!
